

SPRINT 2 - RETROSPECTIVE

	Committed	Implemented	Total
Stories	5	5	30
Points	23	23	155

	Tasks	Points
Story 4	12	5
Story 5	16	8
Story 6	20	3
Story 7	9	2
Story 30	20	5
Total	77	23

	Estimated	Actual
Average of hours per task	53 m	1 h 6 m
Total hours	67 h 45 m	85 h
total task estimation error ratio (= actual / estimated)	1.25	

Did you stick to the proposed DoD? No, some test for front end part were not completed.

What have we learned in this sprint?

- Some bugs in frontend were found in the last minute
- Docker deployment was not completed and it is not considered in the actual hours of this sprint
- Some unexpected illnesses may occur
- Estimation errors were done again
- ★ To better communicate between front end and back end

Propose 1 or 2 things you will improve in next iteration and how

- Include tests for front end part as done in sprint 1
- More and even better communication
- More efficient definition of tasks

Things we are proud of:

- UI: search fields, roles to switch accounts, enrollment of student, calendar view
- Presentation in demo
